None but those who are acquainted with it can form any itea of its great brevity and simplicity, or of the ease with which it can be learned. But what is Phonography? It is a system of short hand writing, which can be written ten times as fast as the common writing, read as easily, and learned with far less trouble.

It is used not only by Reporters, but by hundreds of thousands in this country and in England, for private writing, for composition, for taking testimony, etc.; in courts, for sermons, for correspondence, for book-keeping, etc., etc.; by ladies, by Sudents, by Clerks, by Liergymen, by Lawyers, etc., and is rapidly coming the twice control page.

by therefyreen, by lawyers, etc., and is rapidly coming into general use.

As a lawor saving invention, its value can scarcely be estimated, and it requires but little time to learn to use if for the daily purposes of life. But the objection is made that others cannot read it! Well then let them spend a few hours to learn it, for where is the justice in requiring the active and intelligent to spend ten days in deing what they might, do in one, merely to save the indelent a few hours effort in learning a thing which would be useful to them for learning a thing which would be useful to them to life? The time was when but few persons could write their names, but the progress of the age de mands a more rapid method of writings and while the active and intelligent most and with have the advantages of Phonography, the indolent most sub-mit to the disadvantage caused by their own indo The ease with which it can be brought into profit able and daily use is shown by the following certifi

cates. It is only those who are ignorant of it whe ever speak against it. NASHVILLE, Dec. 13th, 1860 MR. J. W. DOLBEAR: Siz: The few lessons I took from you some time since in Phonography, have enabled me to save more than two-thirds of the labor in preparing my sermons and I have no doubt it will soon camble me to save three fourths of it. I have never spent time more

three fourths of it. I have never spent time more profitably than in its attainment, and I see perfectly tree in recommending it to Clergymen generally, as a means by which a vast amount of time may be sarved and that too with far tess effect than is generally supposed. Its principles are few and simple, of easy attainment and suited to the full expression of every word in the language, either for present use or per n abent record. Yours respectfully,

Pastor of the 24 Presbyterian Church,
Nashville, Tenn.

NASSTVILLE, August 1, 1863. In about six mouths from the time I began the study of Phenography, with less than one-third of study of Phonography, with less than one-third of said time devoted to its attainment. I was employed as Reporter for the United States Board of Claims. The faithful teaching of Mr. J. W. Bulbear, of Nash-ville, and the study and practice of the concise, com-prehensive, and juniciously arranged phonographic books of Ben Pitman, of Clacimust, have thus essily enabled me to make Phonography practically wieful.

enabled me to make Phonography practically useful. Its principles are quickly mistered, and I know of nothing that young persons can learn with equal property of immediate and profitable employment.

The Secretary of War has ordered, July 6th, 1863, in "General Order No. 208, pleuographic reporters employed under the authority of the 29th section of the art of Congress, approved March 3, 1865, will be allowed not exceeding ten dollars per day," ste Tois will of course greatly nursease the denand for Reporters.

In January last Mr. J. W. Dolbear gave, free of charge, a course of lessons in Honography and Writing to myself and many other wounded soldiers in Hospital No. 20. Tellious hours wer; thus chanced to pleasant and profitable ones. We saw highle our knowledge of Phonography, and those who have but the Hospital correspond in it with the wife wounds, writes that he is teaching Phonography, and finds it so predicable that he would not take \$6,000 for what he learned from Mr. D. I think both suidlers and office a would find the learning of it a profitable employment for their leisure time in camp or hespi-tal, without detriment to other deties.

W. G. SHAFER, W. 6, Stiar E. Clerk Hospital No 20

If Phonography were taught to every soldier in the army, Mr. D. believes most of them would value it as highly as the pay they receive from the Govern-ment without in the least interfering with their disment without in the least interioring with their an ties as soldiers.

Hon. Thomas H. Beston said in Congress:

'Had this art been known forty years ago, it would have saved me twenty years of hard labor.'

If Phonography is thus valuable in saving so large an amount of a lifetime, should not every child have its vast advantages, especially when they can be had at so small an expuse of time and money? If it would have saved twenty years of hard labor to the would have saved twenty years of hard labor be brought. tile of one man, should years of hard labor-be brought upon others for the want of a bieseting of such easy
